To provide the best possible fitting harness for your equine, we recommend that you supply the measurements below. If you have ANY questions about measurements, don't hesitate to contact us. **We are here to help!**

MEASUREMENTS

For accuracy, a cloth measurement tape is recommended.		CM/IN.
A	Bridle Corner of mouth over poll (behind ears) to corner of mouth	
B	Nose Band - all the way around the nose (one finger width below cheek bone)	
C	Brow - behind ear around brow to behind ear	
D	Length of horse - centre chest along side to under tail	
E	Height - from ground to withers	
F	Girth - all the way around at saddle location	
G	Length of back - from saddle location to top of tail	
H	Breast - from just in front of saddle/girth, around breast below neck to front of saddle/girth	
I	Over Neck - from location of breast collar, above wither to breast collar on the other side	
J	Breeching - flank around rear end to opposite flank at widest part of hind end	
K	Loin Strap - from position of breeching over loin to breeching on other side	
L	Throat latch - from below ear, under chin to below ear on other side	
M	Collar measurement - place yard sticks, broom sticks, or square at the top of the wither and base of the neck. Measure the distance between the two sticks.	
N	If available, measurement of inside of (top to bottom) current collar.
